

1. I go by Gwen!
2. My pronouns are she/her.
3. My phone number would be the best way of contact. It's 512-574-7690.
4. I took a Kansas Landscapes course last fall at KU which involved some field work. This summer I interned in Japan with an organization that focused on sea turtle conservation where the majority of my days were spent doing field work. Otherwise, that is all the experience I've gotten so far!
5. Many things fascinate me, one being the ocean. The ocean is so mysterious and prehistoric. The way ecosystems work is also very fascinating to me. The way everything works together in harmony. I'm especially intrigued by the ways non-human beings communicate and exists in ways that are so different than humans (at least nowadays). Similarly, I find animals very fascinating too by the way they behave, evolve, and adapt.
6. I'm on the KU cheer team. My schedule can vary at times, but I don't anticipate many conflicts as I scheduled this course at a time that is usually free. I know the importance of attendance, especially with field work classes, so I will do my best to accommodate as needed. I'll be sure to communicate when needed as well!
