

1. My name is Grace and I go by “Grace” or “Gracie”, whichever is easier.
2. My pronouns are she/her.
3. My phone number is (913) 991-8495 and I check my ku email regularly.
4. I had a summer internship this past summer with Heartland Conservation Alliance in KC.
There I did mostly field work removing honeysuckle, completing CHI surveys, chemical sprays, site scouting, and some other tasks. I was mainly working on a 40 acre hickory-oak woodland, but I did visit other locations as well.
5. I’m really into environmental health and all the connections between daily living and its short and long term impacts on a person’s mental and physical wellbeing. Microplastics and radiation are particularly interesting, such as the Trinity testing and the atomic bomb production, as well as the biomagnification of microplastics in the food chain. I also love conservation work and wish to eventually work in some sort of ecosystem restoration or protection.
6. Nope! I just got a tick panel done and unfortunately was around them a lot this summer, but I do have a tick suit.
