

1. What name would you like us to use for you?
 - a. Kyra Blosser
2. What pronouns?
 - a. She/her
3. What's the best contact number to use if we need to reach you on short notice? (Or if you need to reach us!)
 - a. (620) 767-3805
4. What prior experience have you had with ecology or field work?
 - a. While I have experience being in the outdoors and some work with native plants, I am fairly new to ecology and field work. I have taken courses on ecology, but none that involved being in the field.
5. What fascinates you? (pick a thing or two and share a bit of the fascination)
 - a. I am fascinated by how human interactions have shaped the behaviors of different plants and animals. I would love to learn about how “wild” species behaved before human actions may have shaped their survival skills and adaptation processes.
6. Is there anything else you would like us to know about you before the course starts? Please include any concerns you have about being outdoors and completing academically rigorous work.
 - a. I do work two part-time jobs on top of my courses, so I am a very busy person and am not always able to attend last-minute plans and events (some ecology in action events or class schedule changes).
