

1. What name would you like us to use for you?

Sarah

2. What pronouns?

She/her OR they/them

3. What's the best contact number to use if we need to reach you on short notice? (Or if you need to reach us!)

913-218-5379

4. What prior experience have you had with ecology or field work?

I spent this past summer working in the Bever Shultz lab, so I think I have a fair bit of experience thus far. We worked on the dimensions projects and did various data collection and identification out there. I also have experience with prairie restoration work, as I've done a few projects around campus with grounds crew and environmental organizations.

5. What fascinates you? (pick a thing or two and share a bit of the fascination)

I'm super fascinated by restoration ecology. It's something that I've done a bit of work with and I enjoy all of the different aspects you have to think of, like soil quality, disruptions, biodiversity, etc. I envision doing more restoration and conservation work in the future and it's something I find very rewarding.

6. Is there anything else you would like us to know about you before the course starts? Please include any concerns you have about being outdoors and completing academically rigorous work.

I have testing accommodations with the SAC. Looking forward to taking this course!!
