

Hello and Introduction

1. I would like to use Nyah Noronha as my name.
2. My pronouns are she/her.
3. The best contact number to use for me is: +1 (913) 999-0784
4. My prior experience with ecology and fieldwork is taking various classes like freshwater ecology and doing research for the National Science Foundation which required me to do field work in New Mexico!
5. 2 things that fascinates me are jellyfish and learning about different cultures. Jellyfish are so interesting to me because of how diverse they are from size to details and learning about different cultures is so cool to me because I love experiencing new experiences such as trying a meal I'd never find in Kansas or watching a cultural dance etc.
6. I am a little scared to work in R, but that is about it!
