

1. Miya Fletcher
2. She/her
3. (913)-215-6402
4. I've taken one online ecology course
5. Ecosystems and food webs really fascinate me. I think it's very interesting how one change in a food web could collapse the entire thing (example: wolves are taken out of an ecosystem and rabbit populations skyrocket). How humans play a part in these food webs and ecosystems is also very interesting and can sometimes be detrimental.
6. No concerns!
