

Grace Peterman

EVRN 460

August 20th 2025

1. What name would you like us to use for you?

Grace Peterman is perfect thank you!

2. What pronouns?

My pronouns are she/her/any.

3. What's the best contact number to use if we need to reach you on short notice? (Or if you need to reach us!)

The best phone number for me is 7857641192 or my KU email gracepeterman@ku.edu

4. What prior experience have you had with ecology or field work?

I do not have much prior experience but I am excited to learn.

5. What fascinates you? (pick a thing or two and share a bit of the fascination)

Monarch migration! I had an internship with Monarch Watch this past summer. It is so interesting that the changing climate is making monarchs travel north earlier and the negative impacts that it is having on the size of the population.

6. Is there anything else you would like us to know about you before the course starts? Please include any concerns you have about being outdoors and completing academically rigorous work.

Sometimes I have negative run-ins with my mental health. It is well managed now and should not be an issue, but you may get an email from me later in the semester if the situation worsens. I doubt you will, but I thought I should put it on your radar since you asked this question. I am actively getting help. I am glad this is a class where accessibility is important. Thank you.
